

SANATHAN TEXTILES

CATIONIC DYEABLE POLYESTER

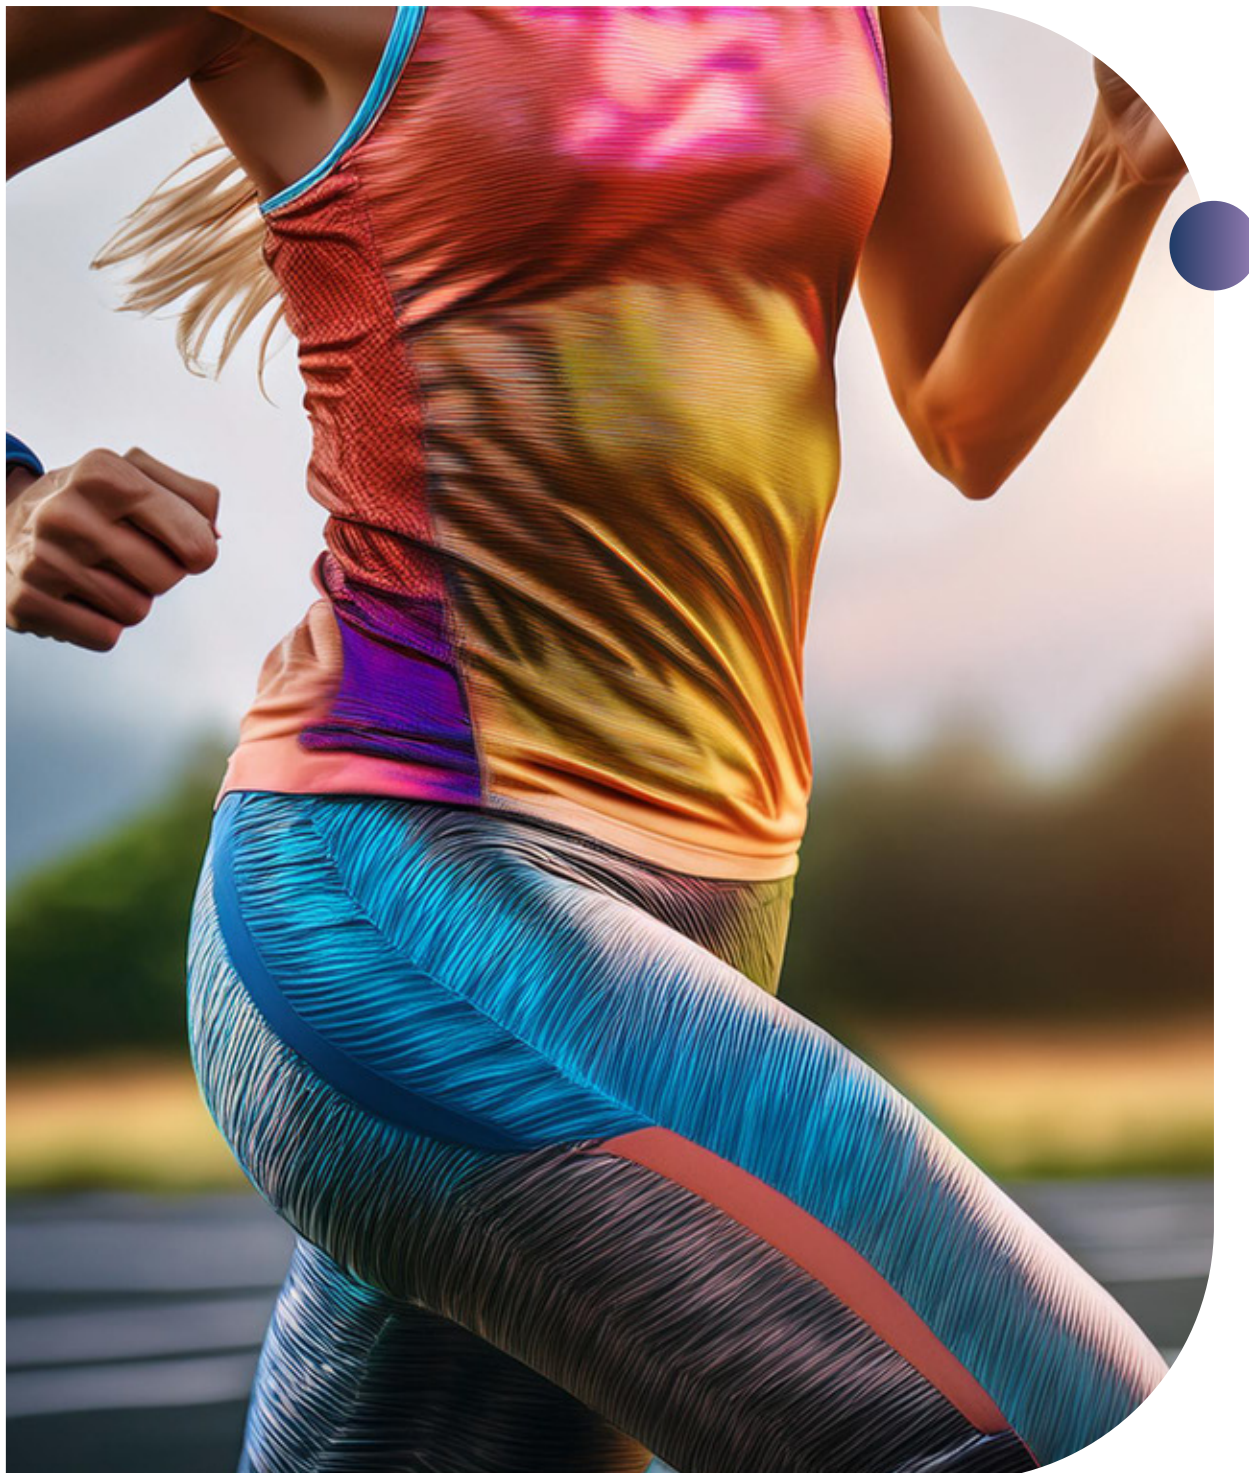

### **Cationic Dyeable Polyester (CDP)**

is a specialised polyester yarn that can be coloured with cationic dyes. It shows excellent colour development and fastness and hence CDP yarns enhances dyeability and results in more vibrant and long-lasting colours.

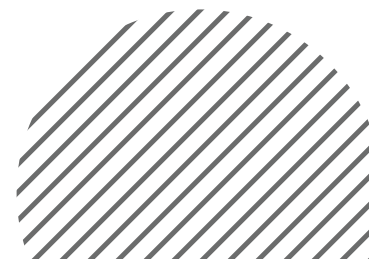

## **ADVANTAGE:**

- Excellent dye affinity
- High luminosity
- Excellent colourfastness  
(Ability to hold vibrant colours)
- Exhibit superior resistance  
to colour fading when  
exposed to water.
- The anionic groups in  
CDP enhance dye absorption,  
leading to better colour  
uniformity and depth.

# APPLICATION

LADIES GARMENT

FANCY YARN CONE

## Product range available in:

**SD-CDP, BRT-CDP, CD Melange**

POY Denier from 60 to 500

DTY Denier from 50 to 600

ATY Denier from 30 to 2000

ETHNIC WEAR

HOME TEXTILES

This value-added Yarn, will contribute to the evolution of the textile industry, catering to the ever-evolving consumer preferences and market demands. The versatility of CDP yarn in fabric makes it ideal for various applications, from fashion and sportswear to home textiles and automotive fabrics. Blending CDP with Fibers like wool, Lycra, cotton, and silk creates luxurious fabrics with enhanced visual appeal. As demand for high-performance and aesthetically pleasing textiles grows, CDP and other value-added yarns will play a crucial role in meeting these needs.
